

Truck Air Heating

Air Top 2000 ST ~ Changing the way you feel about heating

Webasto air heating systems are the ultimate choice when it comes to heating the driver's cab and vehicle interiors economically.

The light weight and compact air heaters are easy and quick to install.

They quickly heat the interior up to the temperature you require, quietly ensuring that you enjoy constant, cosy warmth on board and are also highly cost-efficient, wherever you chose to rest.

The Air Top range of heaters operate independently to heat up the cabin without having to have the engine running.

Air Top 2000 ST

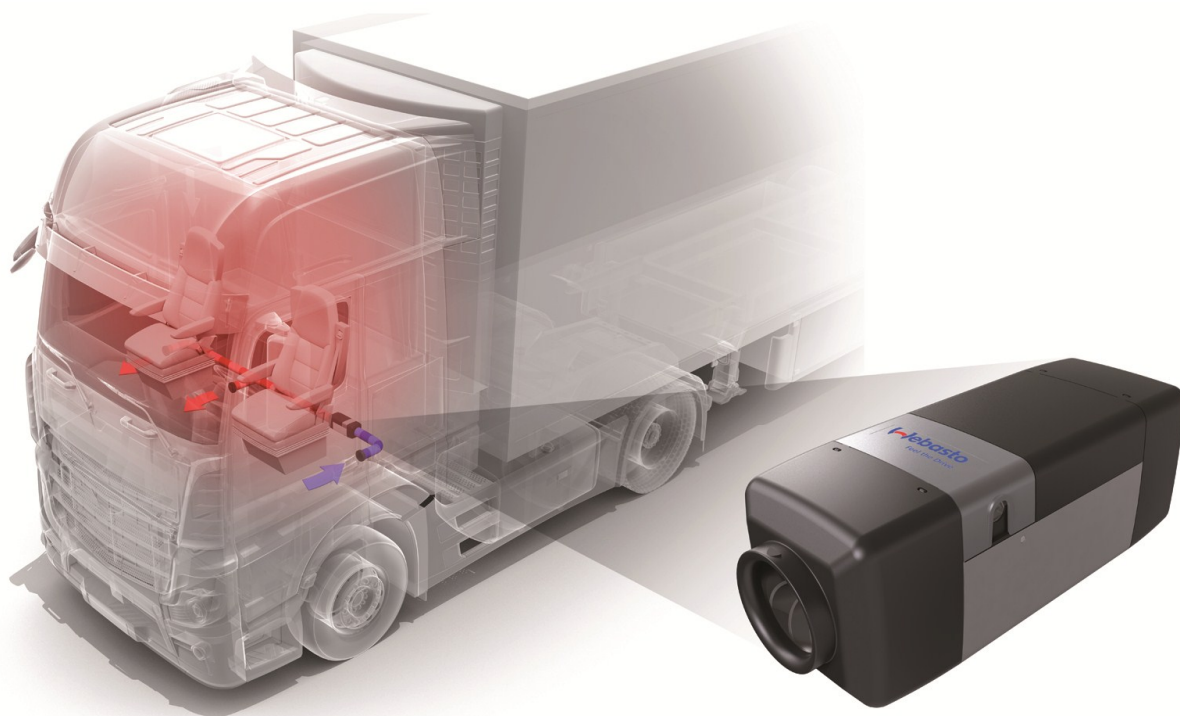

The smallest air heater unit, with ceramic technology and optimum economy for higher heating efficiency—infinately variable temperature control as standard.

Features & Benefits:

- High comfort due to the very quiet operation and step-less power control
- Easy Installation in virtually all vehicles due to compact dimensions
- No engine idling
- User-friendly operation
- Powerful with short heat up times
- Dehumidifies interior when in fresh air mode
- Proven technology—top quality and reliability
- Low fuel and power consumption
- In-Built Diagnostic capability
- 2 year Australia wide warranty
